

Decommissioning Program of Research Hot Laboratory in JAEA

-Technical review of dismantling works for the lead cells Part2-

- The Research Hot Laboratory was constructed in 1961, as the first hot laboratory in Japan.
- In RHL, various PIEs were performed for fuel rods and small samples containing irradiated nuclear materials.

Appearance

Operation room

- All the PIE operations in RHL had been completed. And the decommissioning works of RHL have been performed since 2003.

- ✓ The decommissioning plan of RHL
- ✓ Dismantling procedures of lead cells
- ✓ Conclusions and future plan
