The issue towards decommissioning of 1F

The characteristics of the wastes generated by 1F accident are **unclear**.

It is difficult to carry out processing and disposal.

In order to solve this issue

JAEA has been currently constructing **“Okuma Analysis and Research Center”**.

Laboratory-1

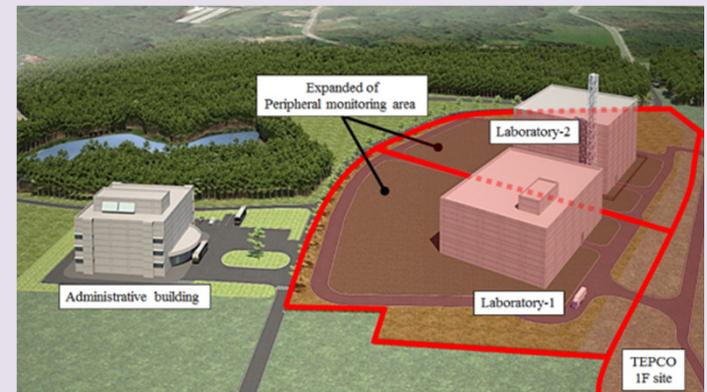

Low and medium level radioactive wastes

Laboratory-2

High level radioactive wastes including corium

Photograph showing a construction site (dated on August 3, 2017)

Okuma Analysis and Research Center (expected completion drawing)

~ This poster outlines **Laboratory-1** of the Okuma Analysis and Research Center. ~
